# WHAT IS DIDIT?

## Revolutionary click furniture

Didit is a **revolutionary do-it-yourself furniture** concept for everyone. The well-known Uniclic for Quick-Step laminate flooring system has been translated into the Uniclic for Furniture system. This allows any piece of furniture to be **assembled quickly without tools**. Besides speedy assembly, a didit unit of furniture can also be dismantled very easily and re-assembled later. Ideal when moving house.

## No tools

Didit furniture can be installed entirely **without the use of tools**: no screwdriver, hammer, nails or screws required. You start off with a sealed didit package, easily transportable. Click and slide the furniture parts together entirely **without frustration** or problems of assembly. didit clicks so quickly and simply together that, from now on, **everyone will be capable of assembling furniture**.

## High quality and design

This furniture is strong and robust. Because of the click connection, which runs along the whole side, you get a good bond across the entire length. With traditional joints, you usually get a connection at two points only, where screws or other fastenings are fitted.

Every didit unit of furniture is made in house, from sheet to finished item. Even the design, the unique ornamentations and structures, are developed in house. New trends are spotted and carefully selected before being translated into didit furniture, with an eye for perfection and detail.

With the finishing process, quality and beauty come together in perfect harmony. The units are finished with HDF backs for the quality, but also so that there is no visible colour difference between back and side.

# DESIGNS

## Whisper oak

A light design with a maritime feeling. The basis, a greyed oak weathered by the wind, is still visible. But the unique character is provided by the combination of the right colour, subtly added graphical elements and the matt finish.

This design is available for bedroom and study rooms.

## Essential oak light

Experience the relaxed atmosphere created by the soft look of this design. The light, natural colour and the total absence of knots radiate a calmness, and look great in both modern and traditional interiors.

This design is available in bedroom, study and living room furniture.

## Essential oak natural

Peace, refinement, subtlety. This design, with the look of French premium oak, has it all. The amazingly natural and soft appearance harmonises excellently with white. Ideal in any traditional or modern interior.

This design is available in bedroom, study and living room furniture.

## Riverside oak

Carefully selected premium oak planks are given different patinas to arrive at this beautiful tint. The result is a warm, brown-grey colour that chimes with the current trends.

This design is available in bedroom, living room and study room furniture

## Italian walnut

Based on the natural colour of exclusive walnut, this design exudes warmth and class. The fine colour nuances and the matt finish give the whole a very attractive appearance. This design perfectly suits a modern and stark interior, but certainly also works well with a more traditional style.

This design is available in study room and living room furniture.

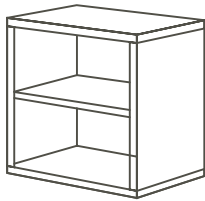

## RANGE AND ORDERING CODES

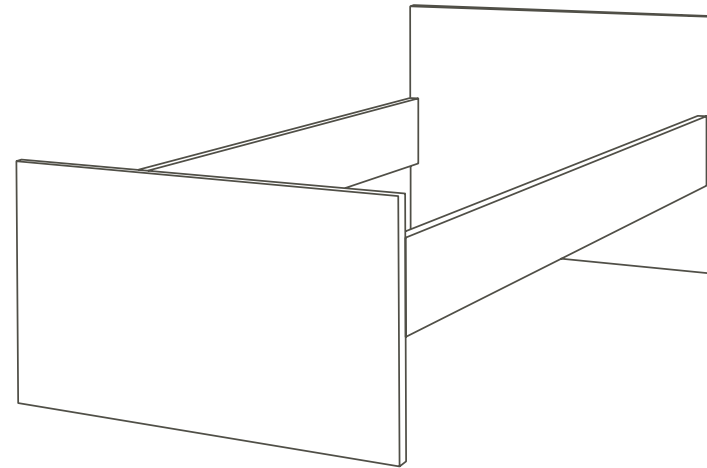

The didit range consists of a variety of models that suit the most diverse interiors: bookcase, open cabinets, coffee table, TV unit, wardrobe, bed, desk, bedside table, etc.
